

Measurement Guide

EASY QUICK MEASURE

Our Measurement Guide is easy to follow, you don't need to be professional to draw out the measurement, we just need a clear and accurate drawing of your space to help us complete the design. Simply follow below 5 steps, and it's that EASY!

Step 1: Kitchen Shape

Draw out your kitchen shape showing all walls that you want to have cabinets. Be sure to include any major structural features or obstacles.

Step 2: Drawer it out

Mark down any windows and door ways, be sure to include radiators or other obstacles that affect where cabinets can be installed.

Step 3: Measurements

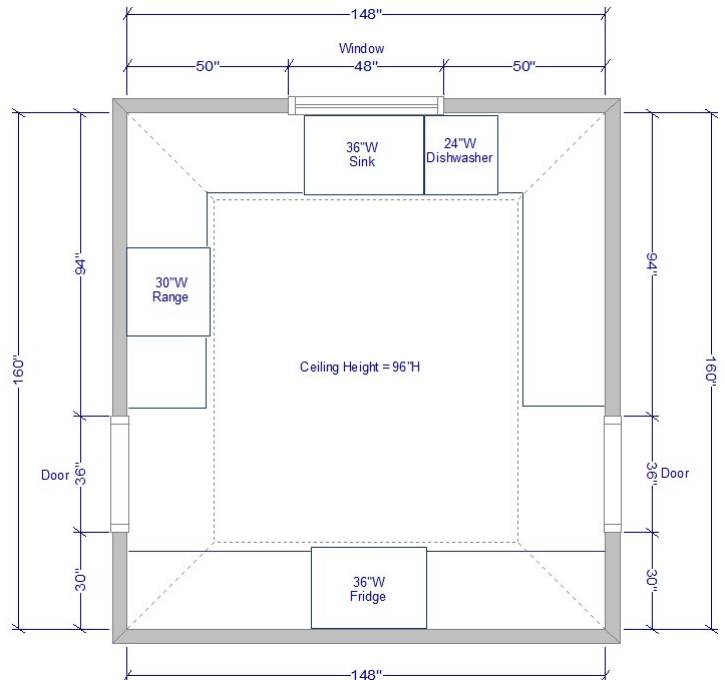

Measure the walls from edge to edge, do NOT measure existing cabinets. Measure window and door sizes and where they located.

Step 4: Appliances

Give us a rough idea of where the appliances located, such as sink, dishwasher, range and refrigerator, as well as the appliances dimensions.

Step 5: Pictures

Send us some pictures of your existing kitchen to help us better understand the layout.

That's it! Now you may complete below form and email back to us at sales@cabinetco.com, you may call 888-363-1160 or text 818-927-6687 for any questions.
